 Achievability Comments: There is nothing to suggest the site is not achievable

OVERALL CONCLUSION:

The site is allocated for residential development and part of the site is now complete. This assessment relates to the remaining balance of the site with no extant permission. An outline planning application for 95 dwellings was withdrawn in 2017 for the undeveloped portion of the site. The undeveloped element of the site is considered suitable for development and is available and achievable. Potential contamination issues in the locality would need to be investigated and mitigated if necessary. The site lies within an area of former coal mining activity and any development in this defined area need to demonstrate that the development will be safe and stable taking full account of former coal mining activities.

Site was made up of former references 08_0069 (west) and 08_0575 (east). Now comprises residual element of 95 dwellings to the east.

17/00418/OUTM for 95 was withdrawn in November 2017 so balance of the site remains allocated for 95 dwellings.

OVERALL CONCLUSION:
The site is allocated for mixed use development and is suitable subject to appropriate mitigation measures as necessary. The site is both available and achievable. Local access and junction arrangements mean that access would have to be secured via the existing private access road to the east of the site. Potential contamination issues at the site would need to be investigated and mitigated if necessary. Any possible development would need to take account of the sites location within the 5km buffer zone for the possible potential Special Protection Area (SPA) to appropriately address any potential impact on protected species habitats as necessary. The site lies within an area of former coal mining activity. Any development in this defined area needs to demonstrate that the development will be safe and stable taking full account of former coal mining activities.

Highway Engineers Comments: Local access and junction arrangements mean that access would have to be secured via the existing private access road to the east of the site. Highway design should comply with the Highway Authority's 6c's design guide (or equivalent replacement that is current at the time of submission). Where appropriate, development proposals will need to be accompanied by either a Transport Statement, Transport Assessment and/or Travel Plan. Current guidance on this is found in Table PDP1 of the 6c's design guide (this may be updated from time to time).

OVERALL CONCLUSION:

The site is allocated for employment development and is suitable subject to appropriate mitigation measures as necessary. The site is both available and achievable. The landowner is seeking a residential-led development on the site which is also suitable in this location. Part of the site lies within flood zones 2 & 3 and development will need to make sure it does not increase the risk of flooding elsewhere and where possible reduces overall flood risk. Part of the site is subject to varied levels of risk of surface water flooding and any proposals would need to satisfactorily address this and provide suitable mitigation if necessary. Any potential development would need to take account of, and address, any detrimental impact on any potential protected species habitats and would need to mitigate against any detrimental impact to the adjacent Local Wildlife Site (SINC). The site lies within an area of former coal mining activity. Any development in this defined area needs to demonstrate that the development will be safe stable taking full account of former coal mining activities.
